DELIVERY & HANDOVER REPORT

reID Website — Design, Build & Handover

A premium, animated marketing site for reID: one identity for sign-in, verification, payments, chat and earning, for people, freelancers and businesses.

01 Executive summary

The old reID page on resystem.org/id has been replaced with a standalone, light-only, Apple-style website at **reidentity.net**. It explains reID to individuals, freelancers and businesses, sells reCorporate, recruits Ambassadors, and is ready for the App Store and Google Play listings.

24	1:58	6	100
landing-page sections, all animated	narrated explainer video, 8 chapters	own legal & support pages	Lighthouse SEO & Best Practices

What was delivered

- Full-screen hero with an identity scan reveal, pixel field, watch card and live chips.
- Product story: Everything-in-one passport, superpowers, app tour, Virtual ID, cashback, verification, unlimited-level legacy network, pay to `name@reid`, reID Chat and contact sharing.
- Security & SSO section plus an interactive "Sign in with reID" demo (OAuth 2.0 / OIDC).
- reCorporate: live animated dashboard built from the new dashboard and role-management screens, legal pathway and industries.
- Ambassador programme with storefront, earning tiles and a horizontal process timeline; industries ecosystem orbit.
- Kokoro-voiced explainer video as a first-visit pop-up that docks into a YouTube-style mini player.
- Store-ready Privacy, Terms, Cookies, Account deletion and Support pages hosted on the site.
- SEO, social sharing and AI discovery: structured data, OG images, sitemap, robots rules for AI crawlers, `llms.txt` and an OpenAPI description so AI agents can send enquiries.
- Phone pass: Apple-style swipe rows, iOS Safari fixes, tighter rhythm on 360–430 px screens.

Status: live on Vercel from `main`. Remaining items are business actions (domain, mailboxes, SMTP, legal sign-off, store links), listed in section 16.

02 Scope, sources & brand rules

Source	Used for
Old site resystem.org/id	Feature list, wording baseline
reID product PDF & app screens (artifacts)	Home, wallet, Virtual ID, login, chat, contact sharing screens
reCorporate pitch + new dashboard / roles screenshots	reCorporate section and live dashboard mock
Ambassador sales pitch	Ambassador section, earning model, process
reID Chat & wallet artifacts	Chat duo and pay-to-name flow
reid-icons repo	Pixel icon sprite
reWallet / reMarketplace sites	Motion language and quality bar

Brand rules agreed during the build

- reID only — **no reAED** mention.
- No ReSystem product links (reWallet, reInvest, reMarketplace) in the ecosystem; show **industries** instead.
- Legacy network has **unlimited levels** (shown as ∞ after L10).
- **Light theme only**; no black sections.
- No hand image in the hero; reference images used for direction only.
- Own legal pages — no redirect to resystem.org.
- Header always visible; reduced spacing; horizontal process.
- No Google Search Console submission; language switcher skipped.

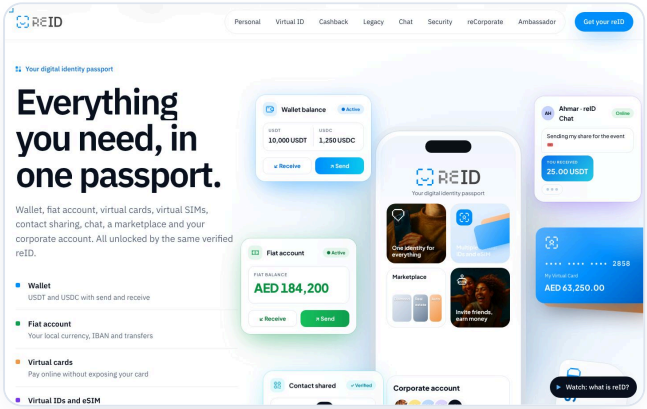

Stack

Node.js / Express (local + API), static HTML/CSS/JS, GSAP 3.12 + ScrollTrigger + Lenis (vendored), deployed on Vercel with a serverless `/api/contact` function.

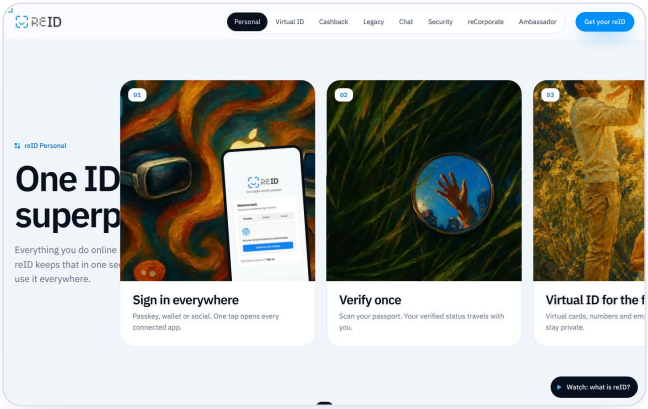

03 What reID is (positioning on the site)

reID is one secure digital identity passport. One login replaces passwords across the ecosystem; one verified profile replaces repeated KYC; one name (`name@reid`) receives payments and shares contacts.

Audience	Message on the site	Where
Individuals	Passkey sign-in, Virtual ID card, wallet, cashback, private chat	Hero, Personal, App tour, Virtual ID
Freelancers	Get paid to name@reid, verified profile builds trust, earn as Ambassador	Wallet, Verify, Ambassador
Businesses	reCorporate: verified company identity, roles, staff, legacy payouts, fiat & crypto	reCorporate
Developers / partners	Sign in with reID (OAuth/OIDC), SSO for the whole ecosystem	Security, SSO demo
Ambassadors	Storefront, commissions through the legacy network	Ambassador

Everything in one passport

Superpowers (pinned horizontal scroll)

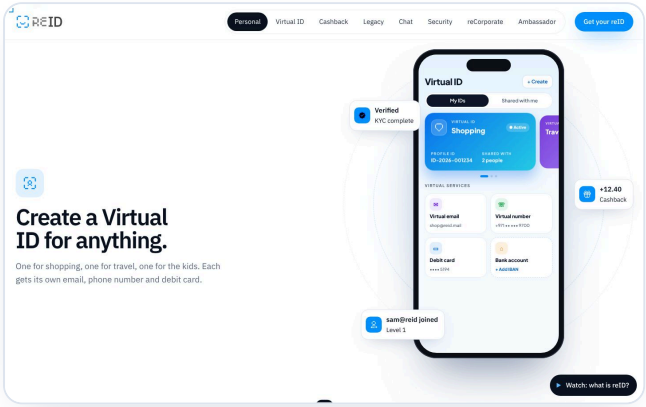

04 Website map

Route	Page / anchor	Purpose
/	Landing (24 sections)	Story, product, business, earning, FAQ, download, contact
#personal · #app · #virtual-id	Personal product	Superpowers, app tour, Virtual ID
#cashback · #verify · #legacy	Earning & trust	Cashback flow, verification, unlimited legacy
#wallet · #chat	Pay & talk	Pay to name@reid, chat and contact sharing
#security · #sso	Security	SSO hub, Sign in with reID demo
#corporate	reCorporate	Dashboard, roles, legal pathway, industries
#ambassador · #ecosystem	Earn & ecosystem	Storefront, process, industries orbit
#faq · #download · #contact	Conversion	FAQ, app download, enquiry form
/privacy · /terms · /cookies	Legal	Store-ready policies
/delete-account · /support	Store requirements	Account deletion request, support contacts
/404	Not found	Branded fallback
/llms.txt · /llms-full.txt · /openapi.json	AI discovery	Summaries and API description for agents
/sitemap.xml · /robots.txt · /.well-known/security.txt	Crawlers	Indexing and security contact

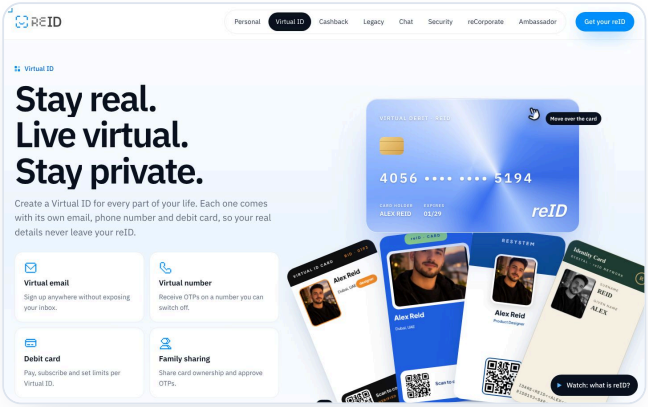

Redirects: /privacy-policy, /terms-and-conditions, /cookie-policy, /account-deletion and /help point to the canonical pages.

05 Hero, app tour & Virtual ID

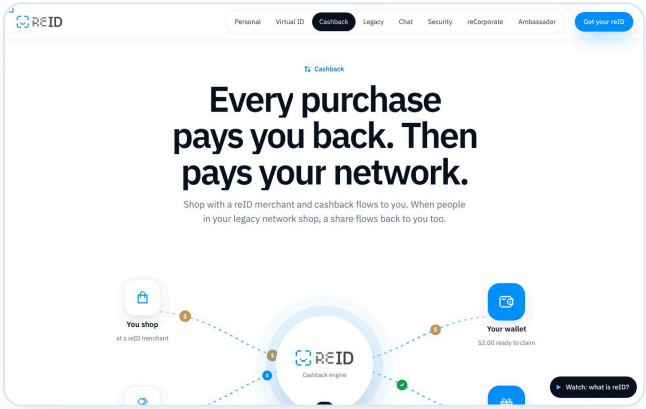

The hero shows a scan frame over the hero image; the beam reveals a verified-ID card. Chips and a watch card open the explainer. The app tour pins a phone while five steps swap screens with clip-path transitions (desktop) or a swipe row with IntersectionObserver (phones). The Virtual ID section tilts a holographic card and fans out card variants.

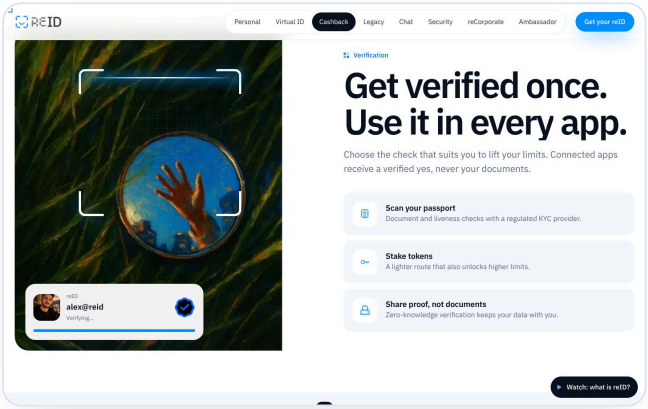

App tour — sticky phone, five screens

Virtual ID — holo card and fan

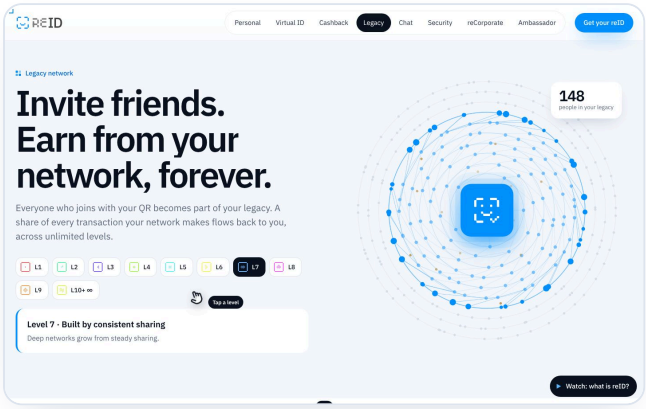

Cashback — coins flow from purchase to wallet

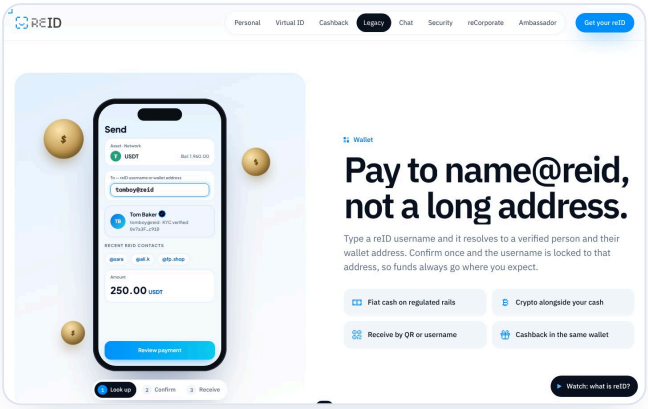

Verification — passport + liveness progress

06 Legacy, pay to name@reid & chat

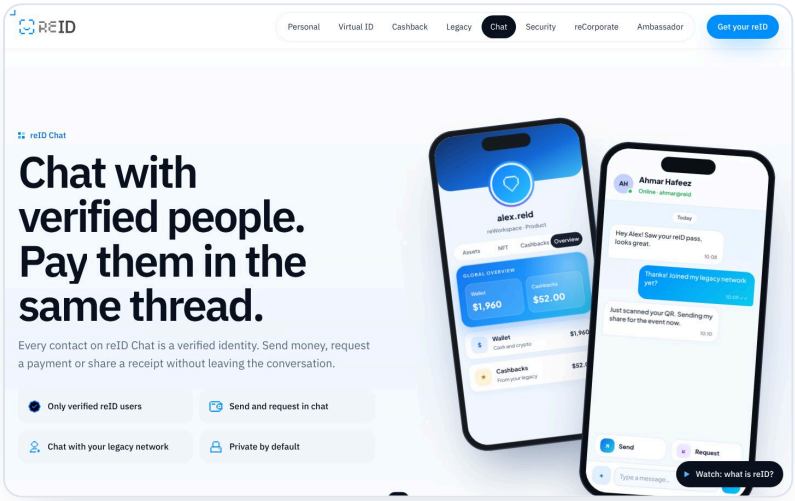

The legacy canvas draws a growing network as you scroll; level counters run L1…L10 and then ∞ to show unlimited depth. The wallet section types `tomboy@reid` into a pay flow across three screens. The chat section pairs the wallet overview with a live reID Chat thread including contact sharing.

Legacy network — unlimited levels

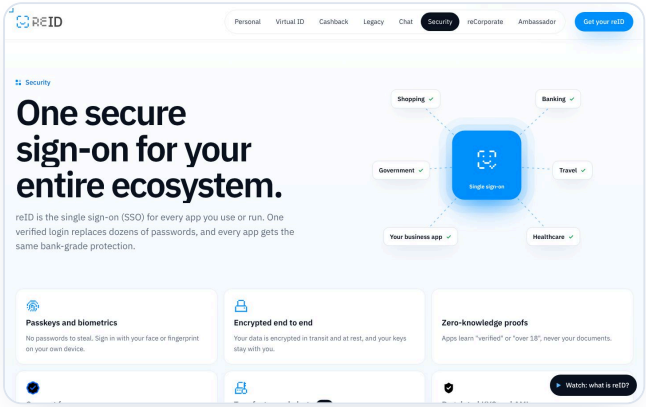

Pay to name@reid flow

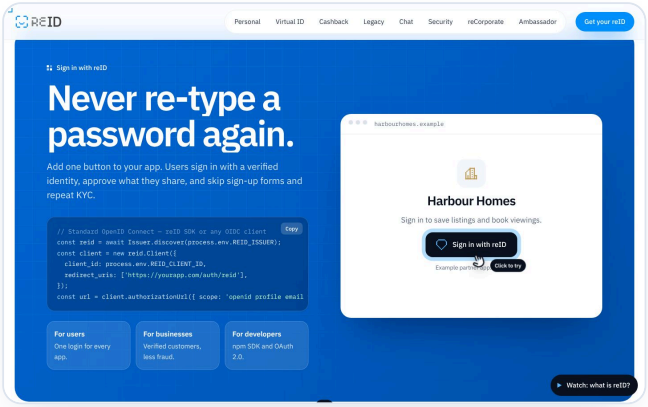

reID Chat and contact sharing

07 Security, SSO & Sign in with reID

A hub animation shows reID as the single sign-on for the whole ecosystem: passkeys, device binding, encrypted storage, consent per app. The demo section lets visitors press a real-looking "Sign in with reID" button (with a tap hint) and watch the consent and success states — the same flow partners integrate via OAuth 2.0 / OpenID Connect.

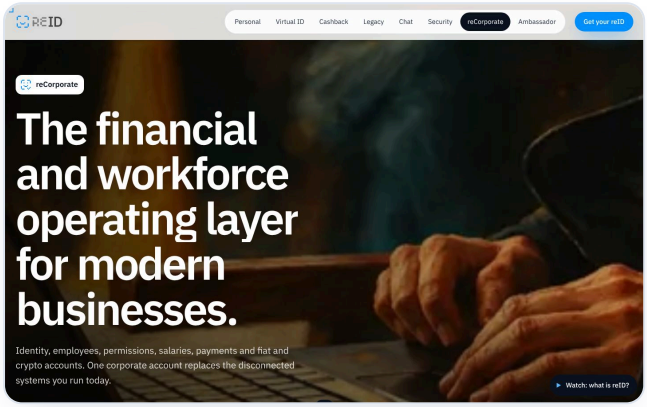

Security & SSO hub

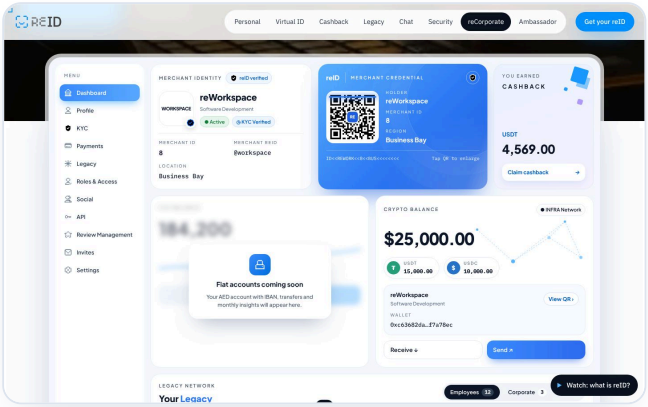

Sign in with reID demo

08 reCorporate

Built from the updated dashboard and role-management screenshots. A 3D-tilted, live dashboard (`#dash3d`) shows merchant identity, credential scan, cashback ticker, crypto network lines, legacy table and fiat marked "coming soon". Below it: versus tiles, a tabbed showcase (identity, roles, legacy, users, fiat, finance card), an onboarding flow line, steps, the legal pathway with QR, and industry chips.

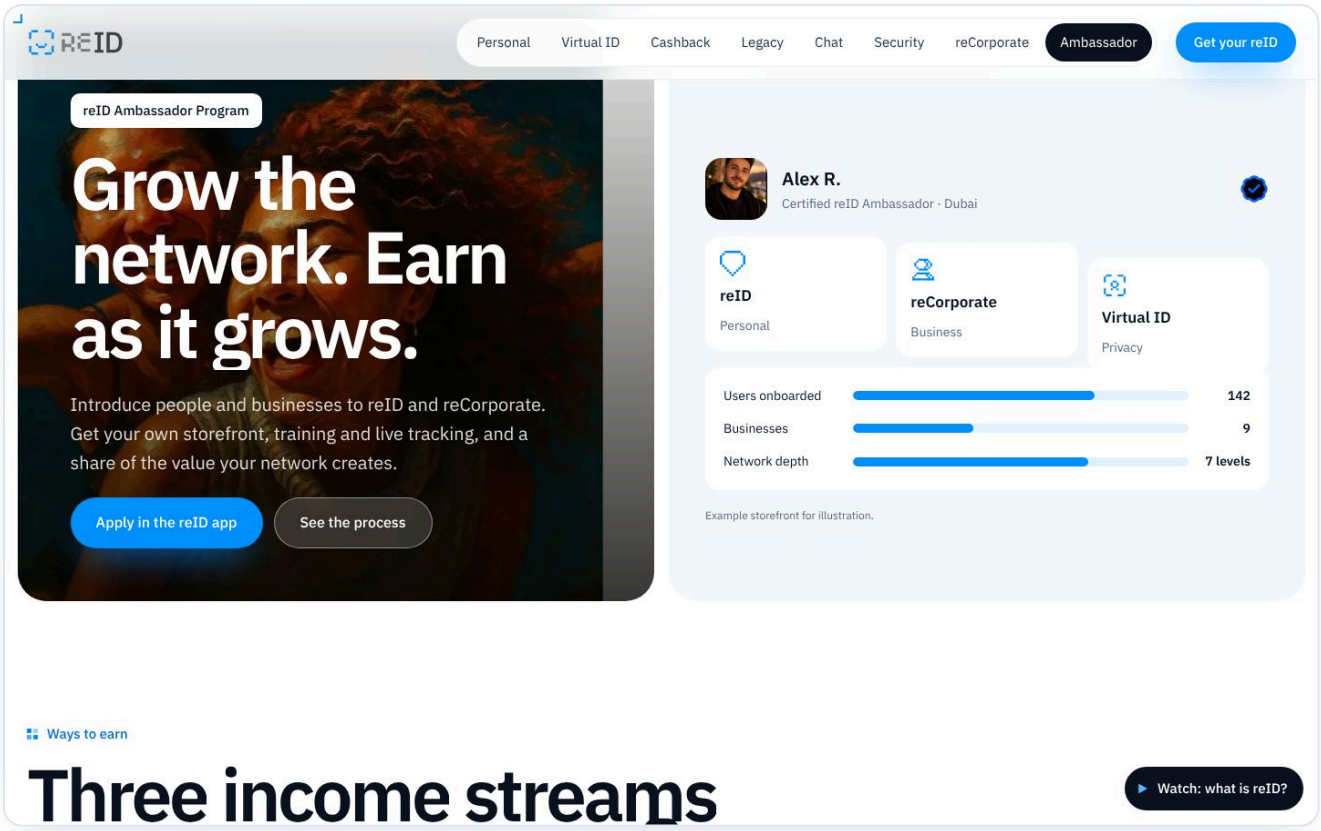

reCorporate intro

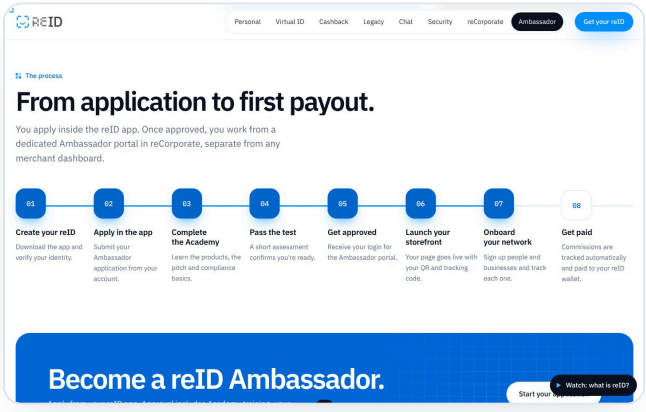

Live animated dashboard

09 Ambassador & ecosystem

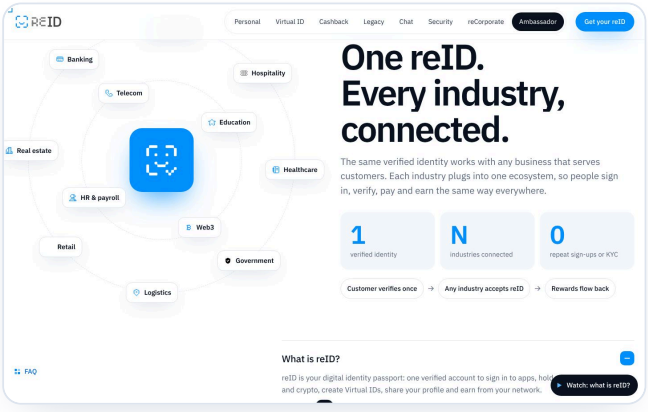

The Ambassador section sells the opportunity: personal storefront, earning tiles, and a horizontal five-step process (apply → verify → storefront → share → earn). The ecosystem section shows one reID connected to N industries in an orbit, with 1 / N / 0 stats (one identity, any number of industries, zero passwords).

Ambassador storefront and earning

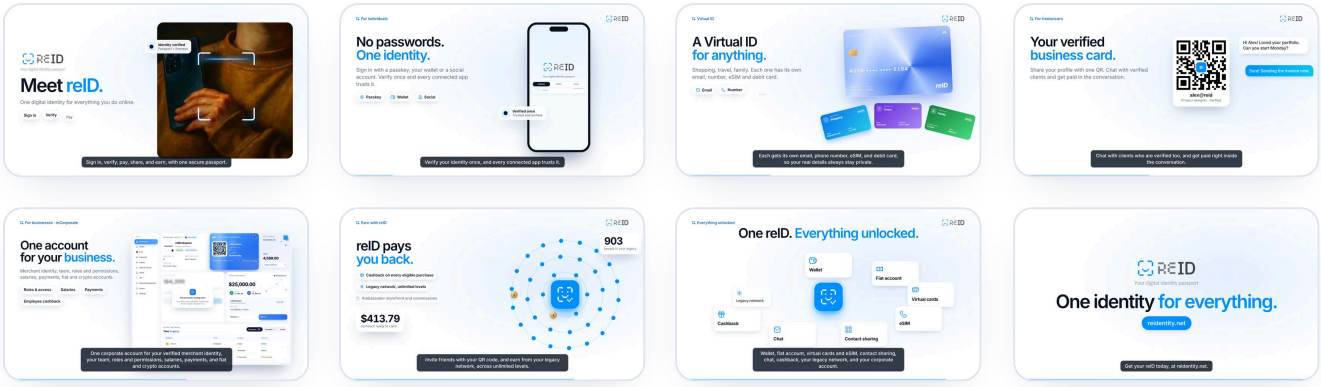

Horizontal process timeline

Industries ecosystem orbit

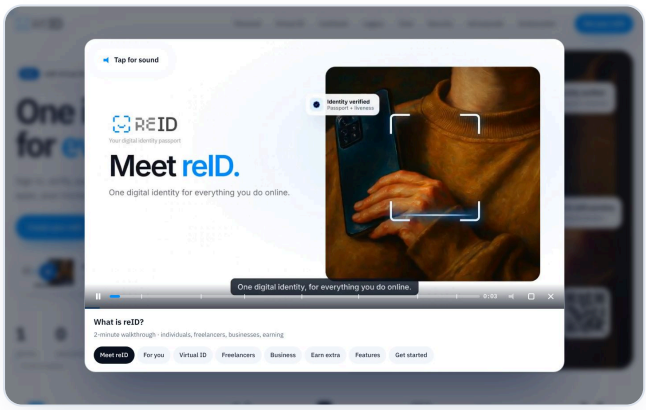

10 Explainer video & player

A 1:58 explainer rendered from HTML scenes (GSAP timeline, Playwright frames, ffmpeg). Narration by Kokoro TTS voice `af_heart` (the voice used for reMarketplace) over generated music with ducking. Chapters: intro, individual, privacy, freelancer, business, earn, features, call to action.

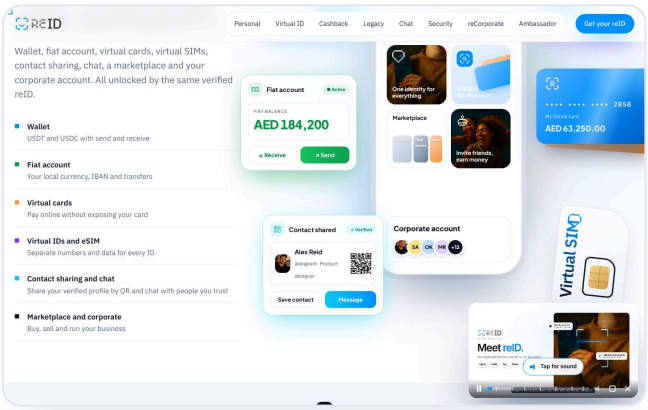

Player behaviour

- First visit: pop-up after 3.2 s, muted with "Tap for sound"; remembered via `localStorage`.
- Scroll, wheel or touch docks it as a mini player that keeps playing (YouTube style).
- Controls: play, mute, expand, close, chapter-marked track; reopen button afterwards.

First-visit pop-up

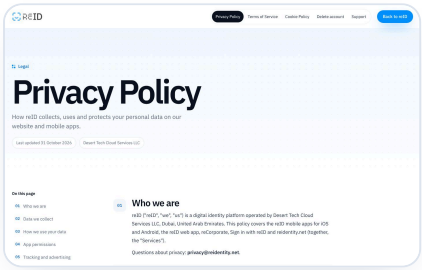

Docked mini player

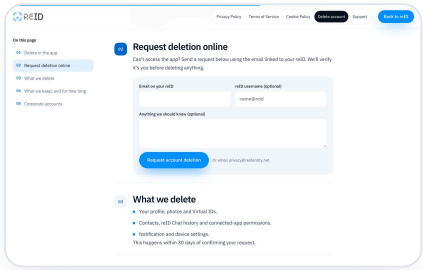

11 Legal, support & account deletion

Generated by `tools/build_legal.py` with a shared template: reading progress, pixel hero, active contents list, reveals. Entity: Desert Tech Cloud Services LLC. Updated 31 October 2026.

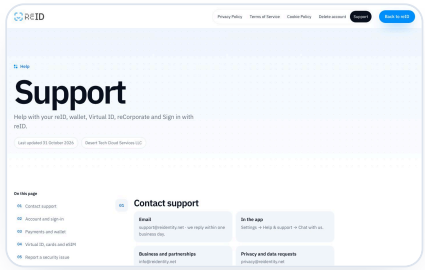

Page	Store requirement covered
Privacy	Data categories, app permissions, no tracking / IDFA, providers, retention (deletion within 30 days, AML records ~5 years), GDPR / UK / CCPA / UAE PDPL rights, 18+
Terms	Licence, acceptable use, Apple App Store and Google Play clauses
Cookies	Essential and preference storage only, no ad cookies
Delete account	In-app steps plus web request form (Google Play requirement)
Support	support@, info@, privacy@, security@ contacts

Privacy

Account deletion

Support

12 Design system & responsive

Tokens

Primary #0091FF Link #0066CC

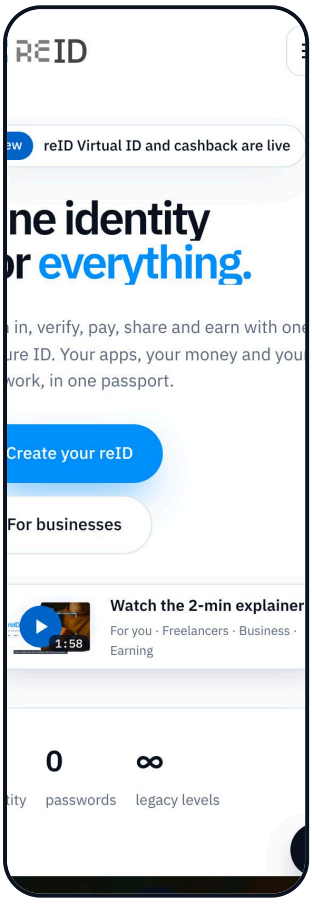

Ink #0B1220 Muted #5E6A7E

Surface #F6F9FC Cashback gold

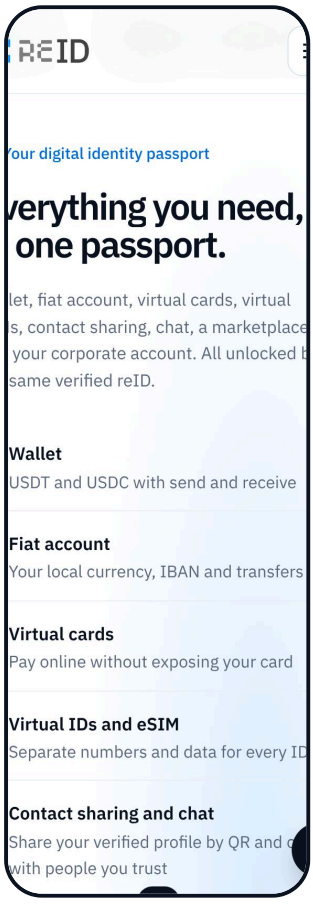

Type: Plus Jakarta Sans (display), IBM Plex Sans (body), IBM Plex Mono (labels) — all self-hosted.

Responsive rules

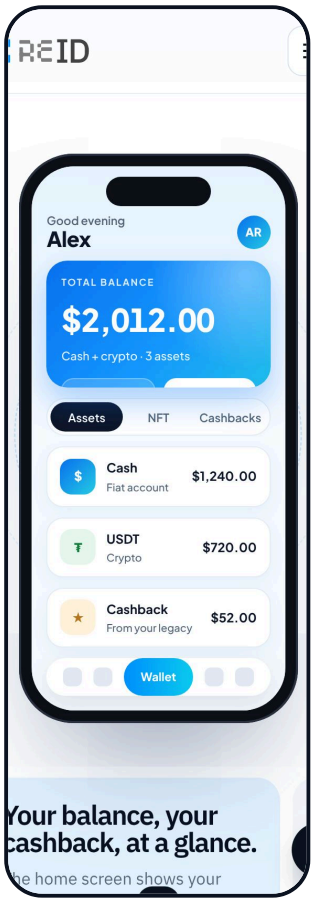

- Breakpoints 1440 / 1024 / 760 / 390 px via `matchMedia`.
- Phones: Apple-style swipe rows (`.m-snap`) for cards, steps, tour.
- Heavy canvas effects skipped under 900 px; loader desktop-only.
- `prefers-reduced-motion` keeps all content visible.

13 SEO, sharing & AI discovery

Area	Implemented
Metadata	Title, 151-char description, canonical, theme colour, per-page OG / Twitter
Share images	og-home-v2 banner + one per legal page (1200×630)
Icons	favicon.ico/svg, 16/32/48, Apple touch, 192/512 + maskable, web manifest
Structured data	Organization, WebSite, SoftwareApplication, Service, VideoObject, FAQPage, BreadcrumbList
Sitemap	Pages + image and video entries + llms files
Share links	Footer: X, LinkedIn, WhatsApp, Telegram, Post on X, copy link
AI crawlers	robots.txt explicitly allows GPTBot, OAI-SearchBot, ChatGPT-User, ClaudeBot, Claude-User, PerplexityBot, Google-Extended, Applebot-Extended, Bingbot, meta-externalagent, Amazonbot, MistralAI, cohere, CCBot and more
AI agents	llms.txt / llms-full.txt summaries; openapi.json describes POST /api/contact (operation sendEnquiry, CORS enabled) so agents can submit enquiries
Security	HSTS, nosniff, frame and referrer policies, permissions policy, security.txt
Not done (by request)	Google Search Console submission; language switcher

Share previews need the og:image URL to resolve: connect **reidentity.net** in Vercel before sharing links. Links shared on the vercel.app address show the app icon instead of the banner.

14 Testing & QA

Page	Performance	Accessibility	Best practices	SEO
Home — desktop	79–88	97	100	100
Home — mobile	~54	97	100	100
Privacy / Terms / Cookies	95–100	100	100	100
Delete account / Support	95–100	100	100	100

Check	Result
Crawl of 7 pages at 1440 / 820 / 390 px	**Pass** — no console errors, no broken links, no horizontal scroll
Phones 360 / 390 / 430 px (iOS Safari + Android Chrome profiles)	**Pass** — stretched icons and SSO overflow fixed
Reduced motion	**Pass** — all content visible
Sticky / pinned sections	**Pass** — overflow-x:clip fix
Contact API: validation, honeypot, 4000-char limit, CORS, OPTIONS 204	**Pass**
Account deletion form → /api/contact	**Pass**
Video pop-up, docking, chapters, reopen	**Pass**
Mobile page height	42,480 → 31,257 px after swipe rows
Mobile performance	**Watch** — animation cost; see open items

Lighthouse 12, headless Chrome, simulated throttling.

15 Developer handover

Run locally

```
git clone https://github.com/reIDentity/reID_Website.git
cd reID_Website && npm install
npm start            # http://localhost:3000
```

Deploy

Vercel project linked to `main`; every push deploys. `vercel.json` holds clean URLs, headers, caching and redirects. `api/contact.js` runs as a serverless function.

Env variable	Purpose
SMTP_HOST / SMTP_PORT / SMTP_USER / SMTP_PASS	Branded emails via nodemailer. If SMTP_HOST is unset, form relays via FormSubmit to info@reidentity.net
MAIL_FROM / MAIL_TO	Sender and team inbox

Project structure

```
index.html  styles.css  screens.css  app.js        landing page
player.css  player.js                               explainer pop-up / mini player
legal.css  legal.js  tools/build_legal.py          legal pages (regenerate: python3
tools/build_legal.py)
api/contact.js  server.js                           enquiry API (Vercel + local)
assets/  vendor/ fonts/ img/ brand/ video/          static assets
tools/og.html  tools/og2.html                       share-image templates
video/  scenes.html render.js voice.py music.py     explainer pipeline (see video/README.md)
robots.txt sitemap.xml llms*.txt openapi.json       discovery files
```

Common edits

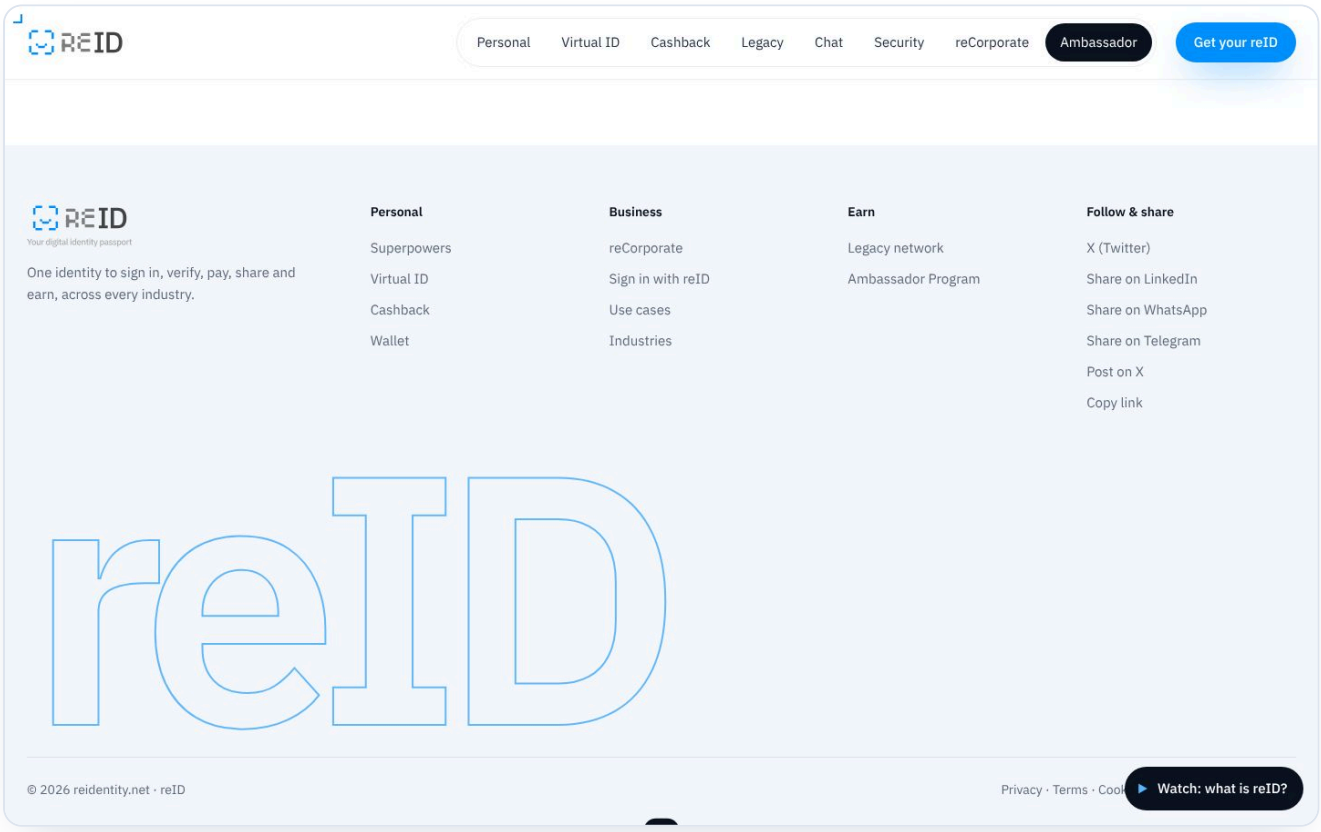

- Copy: edit `index.html`; FAQ answers are mirrored in the FAQPage JSON-LD in the head.
- Legal text: edit `PAGES` in `build_legal.py`, then rerun.
- Video: edit the script in `video/voice.py`, run voice → music → render (README).

16 Open items

#	Item	Owner
1	Connect reidentity.net domain in Vercel (needed for share previews and canonical URLs)	reID team
2	Create mailboxes info@, support@, privacy@, legal@, security@reidentity.net	reID team
3	Activate FormSubmit (one-time confirm email) or set SMTP env vars	reID team
4	Legal review of Privacy, Terms, Cookies before store submission	Legal
5	Add App Store / Google Play links when apps are published	Product
6	Confirm Ambassador commission figures for the site copy	Business
7	Mobile performance ~54: optional lighter animation set for low-end phones	Dev
8	Search Console submission and translations — skipped by request, can be added later	Marketing

Appendix — change log

Commit	Change
0f6566a	New social share banner (og-home-v2)
05e8d00	Mobile polish: swipe rows, iOS icon fix, SSO overflow, compact watch button, form relay + honeypot
730c08f	QA pass: forms relay via FormSubmit, limits
f0b4129	SEO, AI discovery, store-ready legal, account deletion, support, 404, headers, fonts, a11y
00d2851	Explainer video + pop-up / mini player; security + SSO; tap hints; horizontal process; spacing
1bb5343	Legacy network: unlimited levels
ab0c6d0	Own legal pages; industries orbit
fe2cc0a	Sticky app tour fix; number band; footer wordmark
ca50755	Everything-in-one-passport section
3c88f26	Motion rebuild: hero scan, app screens, Virtual ID, cashback, chat, pay flow, dashboard
c518c30	First reID site for reidentity.net
b80ce9b	Initial commit

Footer with share links and legal navigation
